1. INTRODUCTION AND BACKGROUND

The Social Security Board Development Fund (SSDF) was instituted by legislation in 1986. 3.75 percent of contributions collected are put into the Fund which is to be used to fund “socially desirable projects with the prior approval of the Minister”. Thus, the Fund is managed directly by the Board which has to obtain approval for expenditure from the Minister responsible for Social Security.

The Board has set development fund guidelines which stipulate how the funds should be managed. It has established an Endowment Fund so that if at some point there are no excess funds to be set aside for the Development Fund, the fund would still exist. The Board has asked that the focus be on Education, Health, Youth, Culture and Community-based projects with the stipulation that no project should use more than 20% of the funds available and the Board should revisit the criteria after two years.

There will be two (2) calls for projects. One in January and the other in July. The Development Fund will normally accept only one (1) application per organization per year.
